# CLASSIC GLASS SOLUTIONS

“GLASS ARTISTRY BEYOND  
IMAGINATION”

## BACK-PAINTED GLASS

Back painted glass and mirrors are versatile materials extensively utilised in interior design and architectural applications. Common uses include kitchen backsplashes, wardrobe shutters, wall cladding, and decorative panels. These products are available in a diverse array of colours, imparting a sophisticated and contemporary look to various settings. Renowned for their ease of maintenance and durability, they are favoured choices for both residential and commercial projects.

### Key Specifications:

- Material: Clear or extra-clear glass
- Dimensions: Up to 7 feet by 10 feet
- Thickness: Ranging from 4mm to 19mm
- Notable Feature: Customisable in any desired colour.

## ETCHED GLASS

Etched glass finds diverse applications in doors, partitions, windows, cabinet shutters, dividers, and screens. Through techniques like non-reflective treatment, frosted finishes, and sandblasting, a range of designs and textures can be achieved. This adaptable material contributes privacy, decorative elements, and light diffusion to environments, establishing it as a favoured option in interior design and architectural endeavours.

### Key specifications:

- Material - clear or extra clear glass
- Dimensions - Up to 8ft by 12ft
- Thickness - Ranging from 4mm to 19mm

## FUSED GLASS

Fused glass, created through the fusion of layers of glass, finds application in a range of architectural elements such as doors, partitions, dividers, and tabletops. Renowned for its adaptability, fused glass enables intricate designs, a rich palette of colors, and diverse textures, enriching interior spaces with artistic sophistication. Its distinctive qualities make it a preferred choice for both aesthetic embellishment and practical use in residential and commercial settings.

### Key Specifications:

- Material: Clear or extra-clear glass
- Dimensions: Up to 6.5 feet by 9 feet
- Thickness: Ranging from 4mm to 19mm

## FABRIC LAMINATED GLASS

Fabric laminated glass combines fabric layers with glass, creating a decorative material for architectural use. It adds texture and visual appeal while maintaining the safety of laminated glass. Common in upscale interiors, commercial spaces, and luxury retail, it enhances aesthetics and functionality.

Key specifications:

- Glass Type: Clear/Extra Clear
- Max Dimensions: Up to 7ft by 10ft
- Thickness Range: 4mm to 19mm
- Features: Enhances aesthetics and functionality.

## LAMINATED GLASS

Laminated glass is popular in architectural and interior design due to its safety features and versatility. Variants like fabric laminated glass, metal mesh glass, and dichroic lamination offer aesthetic diversity and cater to specific functional requirements, providing texture, modern appearance, and color-changing effects for various design preferences and needs.

Key Specifications:

- Material: Clear/Extra clear glass
- Dimensions: Up to 7ft by 10ft
- Thickness: 4mm to 19mm

## GLASS BRICKS

Glass bricks are translucent, durable building materials that allow light to pass through while providing privacy. They are commonly used in walls, partitions, and windows to enhance natural light, improve privacy, and add decorative appeal to both residential and commercial spaces.

Specifications:

- Colour Options: Clear/Extra Clear, Amber, Blue, Red
- Size: 100mm x 50mm x 200mm

## SMART SWITCHABLE GLASS

Smart switchable glass, commonly referred to as privacy glass, serves as a versatile solution in various settings such as office partitions, shower enclosures, building facades, and areas where privacy is paramount. This innovative glass technology enables seamless transition between transparent and opaque states through manual control, remote operation, or automated sensors. This adaptability offers customizable privacy options, elevates user comfort, and imparts a contemporary aesthetic to interior and architectural designs, addressing a wide array of requirements and preferences.

### Key Specifications:

- Material: Clear/Extra Clear Glass
- Dimensions: Up to 7 feet by 10 feet
- Thickness: Ranging from 4mm to 19mm

## STAINED GLASS

Stained glass is employed in partitions, ceilings, doors, windows, and areas where light plays a pivotal role. Its intricate designs and vibrant colors create mesmerizing patterns while filtering light, adding charm and character to interiors and architectural spaces. Used in religious institutions, historical buildings, and contemporary designs alike, stained glass serves both decorative and functional purposes, enriching environments with its timeless beauty and luminous effects.

### Key specifications:

- Material used- clear/extra clear glass
- Dimensions- Up to 6ft by 10ft
- Thickness- 10mm to 20mm

## DIGITAL PRINT

Digital print glass is utilized in kitchen cabinet shutters, wardrobes, wall backdrops, and table tops, with its marble effect being particularly prominent. This innovative technology allows for high-resolution images to be directly printed onto glass, offering endless design possibilities. The marble effect provides a luxurious aesthetic, mimicking the appearance of natural marble while offering the durability and versatility of glass, making it a popular choice for upscale interior applications.

### Key specifications:

- Material used- clear/extra clear glass
- Dimensions- Up to 5ft by 10ft
- Thickness 4mm to 19mm

## LED MIRROR

LED mirrors integrate energy-efficient lighting into mirrors, enhancing visibility for grooming tasks. They are commonly installed in bathrooms, dressing rooms, and vanity areas, providing even illumination without shadows or glare. LED mirrors offer adjustable brightness levels and color temperatures, catering to personal preferences. Their sleek design and functional lighting make them ideal for modern homes, hotels, spas, and salons, offering both practicality and style.

Key specifications:

- Material used- clear/extra clear glass
- Dimensions- any customized size
- Thickness- 4mm to 6mm (mirror)

## BENT GLASS

Bent glass, shaped through heat treatment, is used in architectural features like curved windows, glass facades, and display cases. Its versatility allows for innovative designs, enhancing aesthetics and functionality in buildings, furniture, and automotive industries. The process creates sleek, seamless surfaces, maximizing natural light and space efficiency. Bent glass adds modern elegance to interiors and exteriors, offering endless creative possibilities in contemporary design and construction.

Key specifications:

- Material used- clear/extra clear glass
- Dimensions- Up to 7ft by 10 ft
- Thickness 4mm to 19mm

## DECORATIVE MIRROR

Decorative mirrors serve as versatile accents, doubling as wall art pieces and thoughtful gifts. They enhance interior decor with their elegant frames and intricate designs, adding depth and visual interest to any room. Whether used as a focal point above a mantel or as a practical adornment in entryways, decorative mirrors elevate the ambiance while reflecting personal style. Ideal for gifting occasions, they offer both functionality and aesthetic appeal.

Key specifications:

- Material used- clear/extra clear glass
- Dimensions- any customized size
- Thickness- customized

## SHOWER ENCLOSURES

Shower cubicles provide enclosed spaces for bathing, offering privacy and minimizing water splashes in bathrooms. They feature glass panels or walls, typically equipped with doors or curtains, creating a dedicated area for showering within the bathroom. Shower cubicles come in various designs and sizes to accommodate different preferences and spatial requirements, offering both practicality and style in modern bathroom layouts.

Key specifications:

- Material used- clear/extra clear glass
- Dimensions- customized
- Thickness- 8mm to 12mm

## GLASS/MIRROR WALL ART

Glass/mirror wall art serves as a striking decor element, reflecting light and adding depth to spaces. Used in homes, offices, and hospitality venues, it enhances aesthetics while creating an illusion of space. With diverse designs, from abstract patterns to geometric shapes, it complements various interior styles. Its functionality lies in transforming bare walls into visually appealing focal points, contributing to the overall ambiance of a room.

Key specifications:

- Material used - clear/extra clear glass + various types of mirror
- Dimensions - customized
- Thickness - customized

## VENETIAN MIRRORS

Venetian mirrors, originating from Murano, Italy, are renowned for their intricate designs and craftsmanship. Used as decorative accents in homes and hotels, they add elegance and sophistication to interiors. Featuring ornate frames and etched details, they serve as statement pieces in entryways, living rooms, and bedrooms. Venetian mirrors also reflect light, visually expanding spaces and enhancing ambiance with their timeless charm.

Key specifications:

- Material used- clear/extra clear mirror
- Dimensions- customized
- Thickness- customized
